Reevaluation of PP No. OF0869 for O,O-dimethyl
S-[4-oxo-1,2,3-benzotriazin-3(4H)-ylmethyl]
phosphorodithioate (Guthion)
Submitted by Chemagro Corporation
Filed August 29, 1969

INTRODUCTION

Other petitions 115, 207, 249, 314, 336, 355, 367, 394, 5F0442, 7F0539
7F0582 and 9F0762.

See our evaluation dated September 23, 1969.

The petitioner is proposing amending his petition by requesting a
tolerance of 0.02 ppm in milk. The old proposal was for a tolerance of
0.1 ppm in milk.

CONCLUSION AND RECOMMENDATION

A favorable opinion is given.

October 21, 1970

Subject: Pesticide Petition Number OP0869 requesting a tolerance for
O,O-dimethyl S-[4-oxo-1,2,3-benzotriazin-3(4H)-ylmethyl]
phosphorodithioate (Guthion)
Submitted by Chemagro Corporation and filed August 29, 1970

To: Charles L. Smith, Petition Control Office

Please refer to our memorandum of September 26, 1969. On September 23, 1970 the petitioner submitted revised Sections B and F.

We have reexamined the residue data, analytical methods and other information in this petition for tolerances of 0.3 part per million (ppm) in or on beans (dry), blackeyed peas (southern peas, crowder peas), potatoes, filberts, pecans and walnuts; 0.2 ppm in or on soybeans; 1.0 ppm in soybean oil; and 0.02 ppm in milk.

It is the opinion of this Department that the proposed tolerances reasonably reflect the amount of residues likely to result.
