058001

Date Out EFB: NOV 01 1985

To: Jay Ellenberger
Product Manager 12
Registration Division (TS-767)

From: Samuel M. Creeger, Chief *SMC*
Review Section No. 1
Exposure Assessment Branch
Hazard Evaluation Division (TS-769)

Attached please find the environmental fate review of:

Reg./File No.: 3125-102, -301, -193 and -123

Chemical: Azinphos methyl

Type Product: Insecticide

Product Name: GUTHION

Company Name: Mobay

Submission Purpose: Add tight-heading variety of cabbage to label

Date In: 10/23/85

Action Code: 300

Date Completed: NOV 01 1985

EAB # 6065-6068

Days

0.1

Deferrals To:

 Ecological Effects Branch

 Residue Chemistry Branch

 Toxicology Branch

Monitoring study requested by EAB:

Monitoring study voluntarily conducted by registrant:

1. INTRODUCTION

The registrant wants to amend the subject labels by adding tight-heading varieties of Chinese cabbage under the label heading of cabbage.

2. CONCLUSIONS

If the label directions for the original cabbage use and the tight-heading cabbage varieties are identical, then the data requirements for the cabbage use are identical to those for tight-heading cabbage varieties.

According to previous EAB reviews, all necessary environmental fate data requirements have been satisfied for use on cabbage and indicate the need for a 6-month rotational crop restriction.
