MEMORANDUM

OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

SUBJECT: Thiabendazole - Data waiver request for a Delayed Neurotoxicity study in the hen, submitted by Merck Sharp and Dohme August 15, 1988. LRA ID No.: 000101; Record No.: 234,291; Tox. Branch Proj. No.: 9-0289

Tox. Chem. No.: 849A

TO: G. Werdig
Product Manager #50
Registration Division (TS-767C)

FROM: Judith W. Hauswirth, Ph.D., Acting Chief
Toxicology Branch 1 - IRs
Health Effects Division (TS-769C)

Judith W. Hauswirth
11/28/88

THRU: William Barnan, Acting Director
Health Effects Division (TS-769C)

Action requested: Consider the registrant's arguments for a data waiver request for a delayed neurotoxicity study in the hen.

Discussion: The registrant is requesting this data waiver since "thiabendazole is not an organophosphate nor is it structurally related to an organophosphate". Furthermore, they state that "there is no evidence that thiabendazole or its metabolites produce delayed neurotoxicity in any species".

Conclusion: The reasons as outlined above under Discussion are sufficient to justify this data waiver request. A delayed neurotoxicity study in the hen should not be required for thiabendazole.
