OFFICE OF  
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

SUBJECT: Chronic dog study - Methyl Isothiocyanate  
EPA No. 068103 Caswell No. 573  
Tox Proj No. 7-0526

TO: S. Lewis/G. Werdig, PM #50  
Registration Division (TS-767C)

FROM: Quang Q. Bui, Ph.D. *Quang Q. Bui*  
Acting Head, Review Section V *4/8/87*  
Toxicology Branch/HED (TS-769C)

THRU: Theodore M. Farber, Ph.D. *Theodore M. Farber*  
Chief, Toxicology Branch *4/8/87*  
Hazard Evaluation Division (TS)

Action Requested: Comments on the proposed chronic dog study.

Registrant: Nor-Am Chemical Company  
Wilmington, DE 19803

The registrant (Nor-Am), in a letter dated March 23, 1987, indicated that a chronic dog study will be conducted with methyl isothiocyanate to comply with the Agency data requirement. The chronic dog study is scheduled to start by August 15, 1987, with a final report available by August 15, 1989.

No comments from the Toxicology Branch are necessary since a protocol for the dog chronic study was not appended with this action. A review of the study will be conducted upon receipt of the final report.
