Requested Action:

Registration for use in manually filled humidifiers to control lime scale, bacteria and algae.

Recommendation(s):

1. The following information is necessary to determine the safety of this product as recommended for use:

a. Concentration of active ingredients in the respirable atmosphere where humidifier is in use. This is to be determined during normal usage for specified time periods (i.e., 8 hours, 16 hours, 24 hours, etc.) at use concentrations and multiples of use concentrations b. The vapor pressures of the components.

c. Based on data obtained in a) a determination will be made concerning the need for a Subchronic Inhalation Test.

2. Submit eye and skin irritation studies (product as formulated).

A. Formulation of Golden Solution:
