Reviewed by Srinivas Gowds	Date 05/13/94
EPA Reg. No. or File Symbol	4959-41
Date Division Received	10-27-93
Type Product	Food Contact Surface Sanitizer
MRID No (s)	None
Product Manager	PM 32 (Douglas)
Product Name	ECONOSAN ACID SANITIZER
Company Name	WESTAGRO, WEST AGRO, INC.
	in response to Agency letter dated
sanitizing s	olution (1 ounce/6 gallons) and
<u>clarifying i</u>	nformation with revised label
Type Formulation	Liquid
Active Ingredient (s):	
Nonanoic Acid	3.0 3.0 8.5 9.5

## 200.0 <u>Introduction</u>

200.1 Uses:

See proposed label dated 10-27-93.

200.2 Background Information:

The submission received 10-27-93, is in response to Agency letter dated Sept. 30, 1993, with requested pH of end use sanitizing solution (1 ounce/6 gallons) and clarifying information with revised label.

201.0 Data Summary

None.

201.1 Abstract of Test Reports:

None.

201.2 Brief Description of Tests:

None.

Subject

Use Solution pH of Econosan Acid Sanitizer

Reference:

The pH of a 1 oz/6 gallon dilution of Econosan, in both deionized water and AOAC 500 ppm synthetic hard water, is shown below.

Deionized

AOAC 500 ppm Hard

2.61

2.95

The reason for stating that the end use sanitizing solution should have a pH of 4, or below, is to ensure that the fatty acid ingredients (nonanoic and decanoic acids) are maintained in their acid forms. It is, primarily, the acid forms of these ingredients which are germicidally active, as opposed to their base-neutralized forms. Though these acids are not actually neutralized at a pH of 4, maintaining the solution pH at or below this level guarantees a comfortable margin of safety.

Michael D. McKinzie
