CONCLUSIONS: This study is scientifically sound. The reported results are considered to be accurate. When a use pattern poses an aquatic hazard this study would meet guidelines requirement for testing a formulation.

METHODS AND MATERIALS:

Test Type: Coldwater fish 96 hr. LC$_{50}$

Test Species: Rainbow Trout

Formulation: 50% (SA-50 Brand Thiodan 50 wettable powder).

REPORTED RESULTS: 96 hr LC$_{50}$ = 0.47ppb (95% C.I. = 0.38-0.59)

DISCUSSION: N/A
