CONCLUSIONS & RECOMMENDATIONS The label amendment is unacceptable in the absence of performance data justifying need for higher rate, which data is alluded to in registrant's 1/31/85 letter. In view of toxicity reactions with this active, especially on cats, need for higher rate must be justified. Also, registrant has never submitted additional data requested for related product 4758-141 on 4/9/82, used at same concentration of active. No data ever submitted for this product, which should be required under 40 CFR 162.18-2(d)(3), former, or 40 CFR 162.163(b)(2)(iii), current. OBJ Vern L. McFarland, IRB-TSS
