O.M. Scotts and Sons has requested a waiver of the reentry and protective clothing requirements for their formulations Proturf Broad Spectrum Fungicide (EPA Reg. No. 538-27) and Proturf Fertilizer Plus Fungicide (EPA Reg. No. 538-36) for use on golf courses. These fungicidal products contain thiram as the active ingredient. EAB has previously supported such waivers for similar products in a memorandum dated 5 June 1987 (Attached) using a theoretical model based on the Ideal Gas Law. EAB also supports waivers for the reentry and protective clothing requirements for the Proturf formulations. It must be noted that these waivers apply only to the reentry scenario and not to any protective clothing requirements for applicators or mixer/loaders handling these products.
