THRU: Charles L. Trichilo, Branch Chief  
Residue Chemistry Branch  
Hazard Evaluation Division (TS-769)

This amendment was submitted in response to our memo (M. J. Bradley) of 7/2/81.

The petitioner has submitted revised Sections B and F requesting a 15 ppm tolerance for residues of atrazine and its dealkylated chlorometabolites in or on orchardgrass and orchardgrass hay. The proposed grazing restriction is now for 6 months after treatment.

This amendment resolves all of RCB's deficiencies. We now recommend for the proposed tolerances provided TOX concurs.
