Attn: Mr. Robert J. Taylor, PM 25

Dear Mr. Taylor:

SUBJECT: REPORT OF CIBA-GEIGY CHEMICALS FOUND IN
GROUND WATER - WALWORTH COUNTY, WISCONSIN

CIBA-GEIGY recently confirmed the presence of atrazine at 3.6 ppb in a dealer well in Walworth County, Wisconsin. Atrazine metabolites were found at levels of 1.6, 4.8 and 6.6 ppb. The dealer has retained a legal consultant to represent him in dealing with the state on remediation measures to be taken.

Sincerely,

Karen S. Stumpf

LIST OF SUBMITTED STUDIES

Letter to Robert Taylor dated 1/3/92 from Karen Stumpf concerning a report of Ciba-Geigy chemicals found in ground water - Walworth County, Wisconsin.

1 pg.

421663Ø1

1. CHEMICAL: Common name(s): atrazine

Chemical name(s): 2-chloro-4-(ethylamino)-6-(isopropyl amino)-s-triazine

Structure (s):

2. TEST MATERIAL: N/A

3. STUDY/ACTION TYPE: Acknowledge receipt of atrazine and degradate detections from a dealer's well.

4. STUDY IDENTIFICATION: A documentation of atrazine degradate detections in well water samples.

5. REVIEWED BY: John H. Jordan, Ph.D.
OPP/EFED/EFGBW/Ground-Water Section
Signature: John H. Jordan

Date: 9/30/92

6. APPROVED BY: Elizabeth Behl, Head
OPP/EFED/EFGBW/Ground-Water Section
Signature: Eliz Behl

Date: 9/30/92

7. CONCLUSIONS: The registrant notified EPA of atrazine and degradates in a dealer's well in Walworth County, Wisconsin. Atrazine was detected at 3.6 ppb; atrazine degradates were detected at 1.6, 4.8, and 6.6 ppb. Remediation measures will be taken. More detailed information is required as specified in the attached form. The information will be included in EPA's Pesticides in Ground Water Database.

8. RECOMMENDATIONS: The registrant should complete the attached 6(a)2 data work sheet and submit the information to the Agency.

9. BACKGROUND/DISCUSSIONS: The data in this action were submitted under Section 6(a)2 of FIFRA. The report of detections contained results of atrazine and degradate analyses in samples of well water. The level reported for atrazine was above the maximum contaminant level (MCL=3 ppb) which may result in unreasonable adverse effects. Combined residue concentrations substantially exceed the atrazine MCL.

2.

Additional specific information is required to locate/identify and evaluate the reported detections of the atrazine residues in ground water. The information requested on the attached 6(a)2 data work sheet will, in most cases, be adequate to meet the requirement. If a monitoring program is of fairly short duration, e.g., one year, a final report of detections is sufficient. An annual report of detections is required if a monitoring program is long-term, e.g., from 2 - 10 years or longer.

The reports should be accompanied by computerized raw data submitted on disks. Disks must be IBM compatible and the software and/or file format must be identified. The computer disks must be accompanied by a description of rows (records) and columns (fields). These monitoring results will be included in OPP's Pesticides in Ground Water Database.
