INTRODUCTION:

GRIFFIN L.L.C. has submitted Storage Stability Data and Corrosion Characteristics (MRID# 27469-01???) for the subject product PROPAZINE 4L

SUMMARY OF FINDINGS:

- 1 . The submitted Storage Stability and Corrosion Characteristics data for the subject product PROPAZINE 4L is for 12 months.
- 2 The study was conducted in accordance with the requirements of U.S. Environmental Protection Agency Good Laboratory Practice 40 CFR § 160, FIFRA.
3. The study was is accompanied by Quality Assurance statement 40 CFR § 160.
4. The samples were stored in and (HDPE) containers for 1 year .
5. Samples were analyzed after 3, 6, 9 and 12 months.
6. No change was observed in (HDPE) containers for after 1 year under storage at warehouse conditions.
7. Griffin Test Method TM -1026 was used for analysis of Propazine .
8. Samples of five lots of Milo -Pro 4L were selected for analysis .
9. Average recovery of the active ingredient Propazine ranged from 43.2% to 45.0% t the end of 12 month period in HDPE containers .

10. The sample and packaging material showed no signs of physical or chemical change during the entire storage period .
11. Appropriate table of recovery with results is included with the submission.

CONCLUSIONS:

TRB has reviewed the aforementioned Data and concludes:

1. Results of Storage Stability (830.6317) and Corrosion Characteristics(830.6320) data (MRID # 461993-01)) for the subject product showed acceptable recovery of Propazine .
2. The data of storage stability and Corrosion Characteristics completely fulfill the requirement of OPPTS test guidelines 830.6317 and 830.6320 respectively.
