SUBMISSION PURPOSE Submission of "updated compilation" of EC data

CHEMICAL & FORMULATION Captan technical

Introduction

Registrant submits "updated compilation of environmental chemistry data". There is no registration activity associated with the submission, therefore there is no regulatory decision to be based upon the submission.

We assume the PM team has complied with SOP 3095.3 (2-28-78) in regard to this submission.

We have determined that the submission is incomplete, in that the registrant fails to identify which data has been previously submitted, by date of submission by File Symbol/Reg. No./PP No. or by accession number, and fails to identify data presented to the Agency for the first time. A reference system by author or title is not maintained in EC Section, therefore the format of the submission precludes in-house determination of the old/new data status.

We are returning the "updated" data submission to the PM team for disposition in accord with Mr. Jellinek's directives in his public policy speech of June 20, 1978, specifically item #5 of page 15.
