ENIRONMENTAL CHEMISTRY EVALUATION FOR: Chlorothalonil

PP# 4E1502
IR-4 Rutgers University

I. INTRODUCTION

1. Daconil, Bravo W-75, Bravo 6-F.

2. Green and dry bulb Onions

II. DIRECTIONS FOR USE:

Max ai/acre is 1.125-2.25 lbs per application

Apply before disease appears and repeat at 7-10 day intervals. Under severe disease conditions use higher application rate and shorten intervals between applications.

Do not apply within 7 days of harvest.
Do not apply to sweet spanish onions.

III. DISCUSSION OF DATA

Data submitted previously is sufficient for environmental chemistry.

IV. RECOMMENDATION
