9-17-79

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

filed 9/18/79

000760

165A

DATE: September 17, 1979

SUBJECT: Vitavax-17 flowable EPA Reg. No. 400-113 Addendum to ~~Scherer's~~ ^{Daherty's} memo of 8-2-79.

FROM: Ray Landolt
Toxicology Branch (TS-769) *filed 9-18-79*

TO: Henry Jacoby
Product Manager#21
Fungicide-Herbicide Branch/RD (TS-767)

Registrant: Uniroyal Chemical Co.
Bethany, Connecticut 06525

Action Requested: The registrant has supplied the missing page of the dermal irritation study describing the test procedure and the amount applied.

Recommendation: Change the data classification from temporarily invalid to guideline.

Skin Irritation - Rabbit, Food and Drug Research Lab Report No. 5495, 6-28-77.

- A. Procedure: The undiluted test material (0.5 ml) was applied to an intact and abraded site on each of six adult albino rabbits. The test site was covered for 24 hours. Animals were observed and graded according to Draize for irritation at 24 and 72 hours after treatment.
- B. Results: Primary skin irritation score 0.08.
- C. Conclusion: 1. Classification of Data - Guideline
2. Toxicity Category IV
