SUMMARY: In response to the data gaps identified in the Methomyl Registration Standard (January 1982), the Dupont Company has submitted additional data (Accession No. 251423) dated September 1983. These data include supplementary information on data gaps identified by the Product Chemistry Chapter of the Methomyl Registration Standard. RCB has reviewed these data and has updated Tables A and B of the Product Chemistry Chapter of the Standard.

Attachment: Confidential Appendices A and B (2 pages)

Description of Beginning Materials and Manufacturing Process (61-2)

The manufacturing process for technical methomyl is discussed in Confidential Appendix A of this report.

This information partially satisfies the requirements under this topic; however, the suppliers of the beginning materials and their address was not given. These are required. This data gap remains outstanding.

Discussion of the Formation of Impurities (61-3)

The registrant has provided a discussion of how various impurities in methomyl are formed. In addition, Dupont has stated that no nitrosating agents are added to formulations of methomyl products. This satisfies the requirements for this topic.

Preliminary Analysis (62-1)

The registrant gives a typical composition of technical methomyl produced by the manufacturing process. This is discussed in Confidential Appendix B of this report. The registrant, however, has not stated how many different batches of methomyl were analyzed to arrive at the percentages of methomyl and impurities found in the technical product. At least five batches must be analyzed. This is a data gap.

Certification of Limits (62-2)

The registrant has not certified limits for methomyl and impurities. This is a data gap.

Physical and Chemical Properties (63-2-63-21)

The registrant has submitted data on physical and chemical properties as follows:

63-3 Physical State: white crystalline solid

63-4 Odor: slightly sulfurous

63-5 Melting Point: 78-79 °C

63-7 Specific Gravity: 1.2946 (25°/4°)

63-8 Solubility:

<u>Solvent</u>	<u>Solubility (g/100 g of solvent)</u>
Water	5.8
Methanol	100
Acetone	72
Ethanol	42
Isopropanol	22
Toluene	3

The registrant should clarify the temperature at which these solubilities were measured. The temperature should be 25° C. This is a data gap.

63-11 Octanol/Water Partition Coefficient: 1.08

63-12 PA: Neutral

Page _____ is not included in this copy.

Pages 6 through 7 are not included in this copy.

The material not included contains the following type of information:

- Identity of product inert ingredients
 - Identity of product impurities
 - Description of the product manufacturing process
 - Description of product quality control procedures
 - Identity of the source of product ingredients
 - Sales or other commercial/financial information
 - A draft product label
 - The product confidential statement of formula
 - Information about a pending registration action
 - FIFRA registration data
 - The document is a duplicate of page(s) _____
 - The document is not responsive to the request
-

The information not included is generally considered confidential by product registrants. If you have any questions, please contact the individual who prepared the response to your request.
