MEMORANDUM

OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

SUBJECT: Alachlor Special Review. Request for Information from BUD.

FROM: Michele L. Loftus, Chemist
Residue Chemistry Branch
Hazard Evaluation Division (TS-769)

TO: Mike McDavit
Special Review Branch
Registration Division (TS-767)

THRU: Charles L. Trichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769)

Residue Chemistry Branch has prepared a list of questions which need to be addressed by Benefits and Use Division for the dietary exposure analysis for alachlor.

For each registered crop, the following questions should be addressed:

What is the percent of the crop treated in the United States? Are there any regional differences in the percent of the crop treated?

Is the use allowed in all states?

Is the crop treated primarily for the fresh or processed market? If crop is treated primarily for fresh or processed market, what percentage of treated fresh and treated processed commodities enter commerce?

Are certain varieties treated more than other varieties?

For corn:

What percent of sweet corn is treated as compared to field and popcorn?
