100.0 Submission Purpose

Union Carbide has submitted comments prepared by their research cooperators relative to EEB's Review of the 1983 Temik Field Trial Michigan.

104.0 Discussion

Some of the comments submitted are somewhat difficult to evaluate in the absence of the study report. (The study report was requested from RD, however, was not received by EEB). However, comparing our summary of the study and their comment, it appears that some data may have not been reported. In the absence of the report this cannot be determined.

While further evaluation of the study report may clarify some of our questions with the study in light of the comments, or provide insight into the above discrepancy, the majority of the comments on the study review appear to confirm our evaluation. However, we will defer final evaluation until we can fully evaluate the comments presented.

107.0 Conclusion

EEB has reviewed the comments submitted by Union Carbide relative to EEB's review of their field study on Temik. The information submit does not appear to alter our conclusions on this study, however, they do raise some questions which need further evaluation. To complete this evaluation we request RD transmit the original study report to EEB.
