DATE: March 4, 1980  
SUBJECT: EPA Reg. #524-308; Glyphosate  
FROM: William Dykstra  
Toxicology Branch (TS-769)  
TO: Robert Taylor  
Product Manager #25  
Registration Division (TS-767)

CASWELL #661A

WMD 3/4/80

WSW

Action Requested: Review amendment to remove crop rotation restriction from label.

Recommendations:

1. The review by EFB shows that crop residue levels ranging from 0.16 to 0.54 ppm at 30 day rotational intervals in rotational crops could be expected from glyphosate treated soils.

These residue levels are considered toxicologically significant and support the rotation crop restriction.
