Environmental Chemistry Evaluation of 0,0-diethyl-S-t-butylthiomethylphosphorodithioate (counter, AC92,100)

EPA File Symbol 241-EGI
PP4F1496 Submitted 5-1-74
Filed 5-23-74
American Cyanamid Company

I. INTRODUCTION

See Environmental Chemistry Evaluation dated 9-30-74 wherein further review of fish accumulation was needed. The additional review has been completed (see C+ED memo of 1-31-75 from W.G. Phillips to J.G. Touhey) C+ED has concluded that persistence and bioaccumulation of AC 92,100 in aquatic systems does not bar registration of the proposed use.

ECS-EEEB therefore withdraws at this time the last paragraph of the recommendations contained in environmental chemistry evaluation of 9-30-74.
