**I. CONCLUSIONS:**

The data base supports the registration of Pirimicarb® technical for terrestrial non-food use to control aphids on alfalfa grown for seed (this use only). This action is taken in accordance to RfD Ad Hoc Committee recommendations dated December 2, 1996. The Committee took into consideration that this is a limited use consisting of 5 states, not exceeding 2 applications per year at a rate not to exceed 2 to 6 ounces per acre of Pirimor DF per year. Major **DATA GAPS** exist for any Section 3 registration of Pirimicarb for food use. Refer to HED Doc.#: 012061; Sep. 20, 1996 and RfD Document dated December 16, 1996 for **DATA GAPS** and toxicity issues.
