1. Introduction

Chemical Name and Type Pesticide: Pendimethalin[N-(1-cthylpropyl)-3,4-dimethyl-2,6-denitrobenzenamine] (penoxalin), Herbicide

Trade Name: PROWL Herbicide

Structure:

The registrant requests an incremental risk assessment and a conditional registration for PROWL and PROWL + Atrazine 80W on grain sorghum in Colorado, Kansas, Nebraska, New Mexico, Oklahoma and Texas. PROWL is presently registered on field corn, cotton, and soybeans.

2. Directions for Use

See attached labels.

3. Discussion of Data

No new EC data was submitted.

4. Recommendations

EFB concurs with the proposed use under the application for conditional registration of grain sorghum, since there is no rotational crop restriction change on the label between use on the registered crops (field corn, cotton, and soybeans) and the proposed grain sorghum.

It should be noted that pending the outcome of the decision on nitroso contamination, registration of this new use must be postponed.
