Attached, please find the EFGWB review of...

Reg./File # : 241-243

Chemical Name : N-(1-3thylpropyl)-3,4-dimethyl-2,6-nitrobenzene

Type Product : Herbicide

Product Name : Prowl

Company Name : Cyanamid

Purpose : Evaluate need for aquatic dissipation study

Action Code : 661

EFGWB #(s): 90-0018 Total Review Time: 1 days

EFGWB Guideline/MRID Summary Table: The review in this package contains...

161-1	162-1	164-1	165-1	166-1
161-2	162-2	164-2 41245601	165-2	166-2
161-3	162-3	164-3	165-3	166-3

NOTE

TO: Mr. Robert Taylor, PM-25
Fungicide/Herbicide Branch

Surface Water Section, EFGWB

THRU: Hank Jacoby, Chief *Hank Jacoby*
Environmental Fate and Groundwater Branch

FROM: Robert K. Hitch, *AK Hitch*
Environmental Fate and Groundwater Branch

Conclusions

Study 164-2, field dissipation for aquatic use, is required for the pendimethalin rice use. The requirement has already been justified and clarified in the Dec 19, 1992 review by Jim Breithaupt (EFGWB #92-0034). We will wait for further word from American Cyanamid Corporation as to whether they have additional questions about the protocol that should be used to satisfy 164-2. Mr. Breithaupt was reviewing a 1991 protocol for 164-2 but it is possibly closely related or the same as the current submission. Neither the submission that Mr. Breithaupt reviewed nor the submission currently under consideration have accession numbers or other labels so that we can determine whether they are identical. I called Dr. Mark Galley at American Cyanamid. Dr Galley's tracking records also leave it unclear as to whether the submissions are identical.

Background

Cyanamid corporation asks whether an aquatic field dissipation study 164-2 (72-7 Fish and Wildlife guidelines) is required to support the rice use of pendimethalin).

Use this form for individual studies & to submit pesticide applications.
