INTRODUCTION

1.1 The registrant has submitted data to satisfy data gaps in the metolachlor registration standard.

2. RECOMMENDATIONS

2.1 This submission is not relevant to the Registrtrion Support Section of EFB. We suggest that this submission be routed to the Registration Standards Section of EFB which is Section #3 and is currently headed by Hudson Boyd (Acting). Also , when routing this submission to section #3/EFB, it is not to go through Marvin Hawkins at all, but probably should go through SPRD.
