## 1.0 INTRODUCTION

Common Name: Iprodione

Trade Name: Rovral

The registrant requests an amendment to the Rovral label to add lettuce. EFB approved a program for an EUP on lettuce Jan. 28, 1983. Iprodione is currently registered on almonds and stone fruits.

## 2.0 DIRECTIONS FOR USE

See attached label.

## 3.0 DISCUSSION OF DATA

No new data submitted.

## 4.0 CONCLUSION/RECOMMENDATION

- 4.1 A previous review (Jan 28, 1983) stated that a rotational crop study would be required for registration of iprodione, even though lettuce would be the following crop, because the soil half-life indicated residues would be present in the soil when the crop was harvested.
- 4.2 The registrant has petitioned for permanent tolerances on lettuce which, if established, would remove the requirement for a rotational crop study, ~~and permit other crops to be rotated.~~ *Other crops would have to have a tolerance, a study, or a restriction.*
- 4.3 EFB concurs with the proposed addition of lettuce to the Rovral label, provided a tolerance is granted.
