SUBSTANCES

MEMORANDUM

SUBJECT: Iprodione - Combined chronic toxicity/carcinogenicity in rats, historical control data: generalized fine vacuolation of zona reticularis in the adrenals

TO: Kathryn Davis PM 52
Special Review and Reregistration Division

FROM: K. Clark Swentzel, Section Head
Toxicology Branch II

K. Clark Swentzel 9/20/93

THROUGH: Marcia van Gemert, Ph.D.
Branch Chief
Toxicology Branch II

M van Gemert 9/21/93

Submission: S446934
Barcode: D194557
MRID NO.: 426378-01
CASWELL NO.: 470A
PC CODE: 109801
REGISTRANT: Rhone-Poulenc

Action Requested

Review subject historical control data.

Response

TB II has completed its review of the submitted historical control data. Based on these data, it was concluded that a no effect dose was achieved in the combined chronic toxicity/carcinogenicity study in rats (MRID No. 426378-01). The TB II review of this study was recently completed and sent forward to SRRD.
