1. INTRODUCTION

1.1 The registrant, Mobay Chemical Corporation, is requesting use of the product BAYLETON 50% WP (in water soluble packets) on apples, grapes, pine seedlings, grasses, pears, wheat and barley. According to EFB evaluations of other Bayleton products, EFB data requirements for these uses have been satisfied with the exception of use on grasses, wheat and barley. Refer to EFB evaluations dated January 19, 1983 and January 12, 1982.

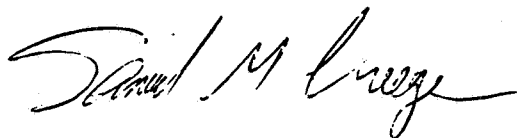

2. DIRECTIONS FOR USE

2.1 Use directions are appended to this review.

3. DISCUSSION/RECOMMENDATIONS

3.1 Data previously submitted and reviewed support the proposed uses of Bayleton (EPA Reg. No. 3125-340) on apples, grapes, pine seedlings and pears.

3.2 Before EFB can concur with the proposed uses on grasses, wheat and barley, the rotational crop data requested in the January 19, 1983 EFB evaluation, section 2.4, will be needed. Also, the registrant must address the issue raised in section 2.7 of the same evaluation.
