SUBJECT: Bayleton® 25% Wettable Powder - additional plants (7) that
are nursery stock and greenhouse use.

Ecological Effects Branch has completed an incremental risk assessment (3(c)(7) finding) of the proposed conditional registration of Bayleton® 25% wettable powder for use on additional nursery stocks outdoors and greenhouse uses. Based upon the available data EEB concludes that the proposed uses provide for no significant increase in exposure or risks to non-target organisms.
