Subject: Bayleton 50 WP; 3125-340

EEB has completed an incremental risk assessment of the proposed conditional registration of Bayleton 50 WP in water soluble packets for use on stone fruits, sugar beets, and cucurbits. A risk assessment has previously been completed (for the same use pattern) for this product in conventional packaging. Based upon the available data, EEB concludes that the proposed uses provide for no significant increase in exposure or in acute or chronic risks to non-target organisms.
