Addendum to DER for MRID # 246736

Triadimefon (BAYLETON) Technical - *Daphnia magna* life cycle

- 1. Chemical: Triadimefon S# 109901
- 2. Test Material: Technical Triadimefon 93%
- 3. Study Type: §72-4(b) Life-Cycle Aquatic Invertebrate
- 4. Citation: Lamb, D.W., (1981) Life Cycle Study of Triadimefon (Bayleton®) to *Daphnia magna*, toxicol. Report No. 226, Submitted by Mobay Chemical Corporation, MRID # 246736

5. Reviewed By:

 Environmental Fate and Effects Division Date: 4-8-93

6. Approved By:

Les Touart, Chief, Section 1 Signature: *L. Touart*
 Ecological Effects Branch
 Environmental Fate and Effects Division Date: 4-15-93

7. Conclusion:

This addendum is made to change the MATC values not the study category it still fulfills the guideline requirements. The original review indicated MATC values of 154-314 ppb. But after reviewing Table II (see original March 1982 review) the 100 ppb and 200 ppb, no effects occur at the 100 ppb level and where they do at the 200 ppb level. Hence, the MATC is changed >100 ppb <200 ppb.
