Deferrals To:

Ecological Effects Branch

Residue Chemistry Branch

Toxicology Branch

1. INTRODUCTION

1.1 The PM has returned applicator exposure studies to EFB. Refer to EFB evaluations on oxyfluorfen dated April 15, 1982 and June 22, 1982.

2. DISCUSSION/RECOMMENDATIONS

2.1 The above-cited evaluations by Emil Regelman would not be changed by this resubmission.

2.2 In speaking with Joe Reinert, it is recommended that the data be sent to Toxicology Branch/HED to determine whether urinalysis is the appropriate method for measuring exposure of the subject chemical, perchloroethylene (PCE), in this case.
