EEB REVIEW
SECTION 24C

Goal

100 Pesticide Label Information

With this submission the states of Washington and Oregon propose to use Goal 1.6E on dormant cottonwood plantings. A label was provided, but no site information was provided. They did not provided the acreages or geographical areas involved. The Registration Division has requested additional information but as of 7/8/85 that information has not been received by EPA (Telephone conversation with R. Mountfort, 7/8/85).

101 Hazard Assessment

No hazard assessment can be performed without specific site information.

102 Conclusions

EEB has reviewed the proposed section 24C to use Goal 1.6E on dormant cottonwoods in Washington and Oregon. EEB is unable to complete a risk assessment because pertinent use site information are lacking.
