SUBJECT: BAQUACIL
EPA File Symbol 10182-R0
Poly(iminoimidocarboyliminoimidocarboyl-
iminohexamethylene hydrochloride)
Shaughnessy No. 111801, CAS No. 576
Request for a conference with members from HED

This product is a new chemical which is 20% active [REDACTED] proposed for use as a swimming pool disinfectant. Efficacy to support the public health related claim is being generated under Experimental Use Permit No. 10182-EUP-11.

Previous reviews of this product have been done by William Dykstra (TB) (6-17-80), Curtis Laird (KEB) (4-18-80) and Madeline Nawar (ZEB) (5-27-80). These reviews have raised questions concerning the data submitted to which the registrant is now prepared to respond. Clarification of some of the items in these reviews is also requested in order that a full unconditional registration be considered for this product. Copies of the registrant's letter are attached. If you need to consult the file or previous reviews they are available in room 321B PH-32 care of Walter C. Francis.

The registrant has suggested the week of August 18-22 preferably August 20 or August 21. Please let us know if one of these dates is acceptable. If not we will contact the registrant and try to arrange a time suitable to all parties.

Sincerely,

AEC
A. E. Castillo
