1.0 INTRODUCTION

Chemical Name and Type pesticide: Acifluorfen (Sodium 5-[2-chloro-4-(trifluoromethyl)-phenoxy]-2-nitrobenzoate, 21.4% a.i. for BLAZER 2S, 20.4% a.i. for BLAZER 2L, Herbicides.

Trade Name: BLAZER 2S, BLAZER 2L

Chemical Structure:

Registrant is applying for an amendment to add peanuts to their current label for soybean registration. An experimental use permit for treatment of peanuts has been in effect for the past two years.

2.0 DIRECTIONS FOR USE

See attached pages.

3.0 DISCUSSION OF DATA

No new EC data submitted.

4.0 RECOMMENDATIONS

EFB concurs with the proposed use under the requested amendment to add peanuts to the registered label on BLAZER 2S and 2L for soybeans.

An additional crop rotation restriction must be placed on the label to the effect that corn ^{may not} ~~must~~ be planted in fields treated with BLAZER 2S or 2L herbicide for 10 months following treatment, and that only grain may be used for food and/or feed purposes (review of 22 April 1980).

Acifluorfen

Page _____ is not included in this copy.

Pages 3 through 10 are not included in this copy.

The material not included contains the following type of information:

- Identity of product inert ingredients.
- Identity of product inert impurities.
- Description of the product manufacturing process.
- Description of product quality control procedures.
- Identity of the source of product ingredients.
- Sales or other commercial/financial information.
- A draft product label.
- The product confidential statement of formula.
- Information about a pending registration action
- FIFRA registration data.
- The document is a duplicate of page(s) _____
- The document is not responsive to the request.

The information not included is generally considered confidential by product registrants. If you have any questions, please contact the individual who prepared the response to your request.
