INTRODUCTION:

This product is in joint review with PMRA-Canada. The registrant, BASF Corporation, is responding to an Agency review of the basic Confidential Statement of Formula (CSF) dated 05 Feb 2003 for the proposed end-use product, BAS 670 336SC Herbicide. In that review, it was determined that the proposed basic CSF was not acceptable because the product contained two inert ingredients which were not cleared for use in formulated pesticide products. With this submission, the registrant is submitting a revised basic CSF dated 05 Feb 2003 and information on the composition of the inert ingredients. TRB has been asked to review this submission.

SUMMARY OF FINDINGS:

TRB has reviewed this submission and reports the following findings:

1. The two inert ingredients in question are cleared for use in formulated pesticide products. See the confidential appendix for details.

CONCLUSIONS:

TRB has reviewed this submission and concludes the following:

1. The revised basic CSF dated 05 Feb 2003 for BAS 670 336SC is acceptable.
