FILE OR REG. NO. 476-EUP-RNG, 476-EUP-RNE

PETITION OR EXP. PERMIT NO. 

DATE OF SUBMISSION 3-18-83

DATE RECEIVED BY HED 6-1-83

RD REQUESTED COMPLETION DATE 8-22-83

EEB ESTIMATED COMPLETION DATE 8-15-83

RD ACTION CODE/TYPE OF REVIEW 700/Eup

TYPE PRODUCT(S): I, D, H, F, N, R, S Herbicides

DATA ACCESSION NO(S). 

PRODUCT MANAGER NO. R. Taylor (25)

PRODUCT NAME(S) SC-0224 Concentrate: 476-EUP-RNE

SC-0224 4LC: 476-EUP-RNG

COMPANY NAME Stauffer Chemical Company

SUBMISSION PURPOSE Proposed EUP's for use in non-crop areas such as airports, cemeteries, ditch banks, etc.

SHAUGHNESSEY NO. CHEMICAL, & FORMULATION % A.I.

____________________

____________________

____________________
100.0 **Section 5 Application**

SC-0224 4-LC and SC-0224 are formulations of a nonselective foliar systemic herbicide that is to be used on non-crop areas (cemeteries, fence rows, road ways, rights of way, industrial areas, irrigation ditches during noncrop season, forest planting sites, etc.)

100.1 **Application Rates/Methods/Directions**

Under the proposed Experimental Use Permit (EUP), C-0224 4-LC and SC-0224 are to be applied by spray, wiper and hand directed spot application. See accompanying labels and directions.

100.2.3 **Precautionary Labeling**

Do not apply to any body or water. Do not contaminate water by cleaning of equipment or disposal of wastes.

100.3 **Target Organisms**

Control of perennial weeds (Refer to accompanying label).

100.4 **Objectives of Proposed EUP Program**

1. Obtain sufficient efficacy data to register the product

2. Obtain product formulation information, such as stability under field conditions, foaming and emulsification with varying hardnesses of water.

3. Obtain product performance information on various commercial spray and wick application equipment under field conditions.

100.6 4. Evaluate the product performance to determine: specific rates for specific weeds; as well as whether commercially significant regrowth of weeds occur if the entire plant parts aren't controlled, and if multiple applications are necessary for control of some weeds.

100.6.1 **Duration/Date/Amount Shipped**

1. Proposed period of shipment: September 1, 1983 to September 1, 1985

2. Permission is requested for 2,500 gallons or 10,000 lbs active equivalent (SC-0224 4-LC)

3. Permission is requested for 725 gallons or 4000 lbs. active equivalent (SC-0224)
100.6.2 **Geographical Distribution**

Stauffer proposes that SC-0224 4-LC be tested in 41 states (Maximum of 20,000 acres). Refer to List of State Distribution and acreage.

101.0 **Physical and Chemical Properties**

Data not reviewed by EAB.

103.2 **Toxicology Properties**

103.2.1 **Avian Acute Oral LD50**

104.0 Hazard Assessment

SC-0224 is a nonselective foliar systemic herbicide for weed control in non-crop areas. This is a new product and has not been previously registered. The proposed EUP calls for an application of SC-0224 equivalent to 2 lb ai/A.

104.1 Likelihood of Adverse Effects to Non-Target Organisms

Toxicological findings suggest that SC-0224 is slightly toxic to birds (mallard duck LD$_{50}$ = 950 mg/kg), practically non-toxic to fish (trout LC$_{50}$ = 1800 mg/l) and slightly toxic to aquatic invertebrates (Daphnia LC$_{50}$ = 71 mg/L).

SC-0224 is to be applied at the maximum rate of 2 lbs ai/A. The expected residue values from this application are listed in table 1.

<table>
<thead>
<tr>
<th>Table 1. Maximum Expected Residues on Terrestrial Substrates (ppm).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short Rangegrass</td>
</tr>
<tr>
<td>Long Grass</td>
</tr>
<tr>
<td>Leaves</td>
</tr>
<tr>
<td>Insects</td>
</tr>
<tr>
<td>tap 0.1 inch soil</td>
</tr>
<tr>
<td>direct application to water (top 0.5 inches)</td>
</tr>
</tbody>
</table>

These expected residues suggest that SC-0224 is acutely non-toxic to birds and aquatic organisms. However, the Ecological Effects Branch (EEB) cannot complete a hazard assessment until data pertaining to SC-0224's physical and chemical properties are evaluated by the Ecological Assessment Branch (EAB).

104.2 Adequacy of Toxicity Data

The registrant has met the requirements for acute toxicity testing. However, EEB may require chronic testing after reviewing EAB's conclusions regarding the physical and chemical properties of SC-0224.

104.3 Endangered Species

The toxicity of SC-0224 to a wide selection of plants suggests that endangered plants could be impacted if found in the treatment area.

The use of this product should be cleared with the respective state or Federal Office of Endangered Species to determine if endangered plants are located in the treatment area.
Conclusions

The Ecological Effects Branch (EEB) has completed the proposed EUP review for the use of SC-0224 on non-crop areas. Based upon the available data, EEB concludes that the proposed use provides for no significant exposure to nontarget fish and wildlife. However, the registrant should be aware of the possible danger to endangered plants and must contact the Office of Endangered Species prior to spraying to determine whether the treatment areas coincide with endangered plant habitat.

Labeling:

"Do not apply directly to water. Do not contaminate water by cleaning equipment or disposal of wastes."
