Hazard Evaluation Division (TS-769C)

EAB will be preparing an exposure assessment on cyfluthrin (Tempo 2, EPA Reg. No. 3125-GLE) and will require usage information. The assessment will estimate exposure to humans resulting from the use of cyfluthrin on ornamentals and greenhouses. In order to calculate daily and annual exposures for this use, pertinent use information (i.e., treatment rate and frequency, application practices) will be needed. A copy of the label is attached. If possible, please provide the information by Friday, September 18, 1987.
