Review Section I, TOX Branch II (HFAS) (H7509C)

and

Marcia van Gemert, Ph.D., Branch Chief *M. van Gemert 7/21/90*
TOX Branch II (HFAS) (H7509C)

Registrant: US Borax and Chemical Corporation

Action Requested: TOX Branch II was requested to review a "Dermal Sensitization Study in Guinea Pigs" for Firebrake ZB Zinc Borate 2335. This study was provided to satisfy an existing data gap.

Recommendation: No evidence of dermal sensitization was reported in the subject study when the test material was patched as a 75% aqueous paste. However, no concurrent positive control data was provided to document that the study was conducted properly and that the test system was responding appropriately. On this basis, the study was classified as "Supplementary" and the data gap remains unsatisfied.

The registrant should provide another dermal sensitization study containing the appropriate controls.
