128897 Lambdacyhalothrin	0.5
<u>Inert Ingredient(s)</u>	<u>99.5</u>
Total	100.0%

**ACTION REQUESTED:** PM requests review of acute oral toxicity study for Chemsico Insecticide Concentrate 5L, EPA Reg. No. 9688-183

**BACKGROUND:** Chemsico has submitted a new acute oral toxicity study (MRID 45575201) in support of eliminating the requirement for Child Resistant Packaging (CRP) for its product Chemsico Insecticide Concentrate 5L, EPA Reg. No. 9688-183. A previous acute oral toxicity study submitted (MRID 45397803) triggered CRP because the LD<sub>50</sub> was between 500 and 5000 mg/kg. Both studies were conducted at Product Safety Labs, East Brunswick, New Jersey.

**RECOMMENDATIONS:** The acute oral toxicity study has been reviewed and is classified as acceptable. An LD<sub>50</sub> of 1750 mg/kg was determined using the data obtained from both acute oral toxicity studies. Therefore, CRP is no longer required.

The acute toxicity profile for Chemsico Insecticide Concentrate 5L, EPA Reg. No. 9688-183, is as follows:

acute oral toxicity	III	Acceptable	MRID 45575201
acute dermal toxicity	IV	Acceptable	MRID 45397804
acute inhalation toxicity	IV	Acceptable	MRID 45397805
primary eye irritation	IV	Acceptable	MRID 45397806
primary skin irritation	IV	Acceptable	MRID 45397807
dermal sensitization	No	Acceptable	MRID 45397808

**LABELING:** Based on the toxicity profile above, the following are the precautionary and first aid statements for this product as obtained from the Label Review System.

**PRODUCT ID #:** 009688-00183

**PRODUCT NAME:** CHEMSICO INSECTICIDE CONCENTRATE 5L

### **PRECAUTIONARY STATEMENTS**

#### **Hazards to Humans and Domestic Animals:**

**SIGNAL WORD:** CAUTION

Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

#### **First Aid:**

If swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-xxx-xxxx for emergency medical treatment information.

## DATA EVALUATION RECORD

**STUDY TYPE:** ACUTE ORAL TOXICITY TESTING (870.1100 formerly §81-1)

**Product Manager:** 03

**Reviewer:** Eugenia McAndrew

**TEST MATERIAL PURITY:** Chemsico Insecticide Concentrate 5L; 0.5% Lambdacyhalothrin

**CITATION:** Merkel, D. (2001) Chemsico Insecticide Concentrate 5L; acute oral toxicity in rats. Product Safety Labs, East Brunswick, New Jersey. Laboratory Report Number 11333. November 12, 2001. MRID 45575201. Unpublished.

**SPONSOR:** Chemsico, Division of United Industries Corp., 8825 Page Blvd., St. Louis, MO 63114

**EXECUTIVE SUMMARY:** In an acute oral toxicity study (MRID 45575201), five young adult Sprague-Dawley derived albino rats/sex (Weight: 202-230 g males; 181-204 g females; Source: Ace Animals, Inc., Boyertown, PA) were given a single oral dose of Chemsico Insecticide Concentrate 5L (0.5% Lambdacyhalothrin; Lot # PSL-0201-0012; slightly yellow solution). Based on the results of previous PSL study number 10356, during which dose levels of 500 and 5000 mg/kg were tested, a dose level of 1500 mg/kg was selected. Animals were observed for clinical signs of toxicity and mortality for 14 days post dosing. Gross necropsies were performed on all animals.

Oral LD<sub>50</sub> Males and Females is estimated to be 1750 mg/kg (determined graphically using data from previous acute oral toxicity study - PSL study number 10356 with MRID 45397803)

Chemsico Insecticide Concentrate 5L is classified as Toxicity Category III based on the LD<sub>50</sub> values in the males and females.

One male and one female died within 3 hours of test substance administration. Toxic signs noted prior to death included facial staining and hypoactivity. The surviving rats exhibited facial staining, abnormal posture, hypoactivity and/or a reduced fecal volume. The survivors recovered by day 2 and gained weight during the study. Gross necropsy of the decedents revealed discoloration of the lungs and intestines. No gross abnormalities were noted for the animals necropsied at the end of the study.

This study is classified as Acceptable (870.1100) and satisfies the guideline requirement for an acute oral study in the rat.

**COMPLIANCE:** Signed and dated GLP, Quality Assurance and Data Confidentiality statements were provided.

**RESULTS:**

Dosage (mg/kg)	Number of Deaths/Number Tested		
	Males	Females	Combined
500 <sup>1</sup>	0/5	0/5	0/10
1500	1/5	1/5	2/10
5000 <sup>1</sup>	5/5	5/5	10/10

<sup>1</sup> Data obtained from:

Merkel, D. (2001) Chemsico Insecticide Concentrate 5L; acute oral toxicity in rats. Product Safety Labs, East Brunswick, New Jersey. Laboratory Report Number 10356. April 17, 2001. MRID 453978-03. Unpublished.

**OBSERVATIONS:** One male and one female died within 3 hours of test substance administration. Toxic signs noted prior to death included facial staining and hypoactivity. The surviving rats exhibited facial staining, abnormal posture, hypoactivity and/or a reduced fecal volume. The survivors recovered by day 2 and gained weight during the study.

**GROSS NECROPSY:** Gross necropsy of the decedents revealed discoloration of the lungs and intestines. No gross abnormalities were noted for the animals necropsied at the end of the study.
