OFFICE OF
PESTICIDES AND
TOXIC SUBSTANCES

MEMORANDUM

SUBJECT: Expedited Review of Accent (new chemical)
FROM: Anne Lindsay, Director
Registration Division (H7505C)
TO: Anne Barton, Director
Environmental Fate and Effects Division (H7507C)

This is a follow-up to our memo dated May 16, 1989, at which time Dupont requested to meet with the Agency to discuss their new chemical application package.

On April 7, 1989, Dupont submitted all part 158 guideline requirements with the exception of completed chronic toxicity studies. The company requested the Agency to begin review of the submitted data while the toxicology studies were being completed. The company committed to deliver all final toxicology reports in early January, 1990. The Registration Division, informed Dupont that a complete data package would be required before Accent would be accepted for full registration review.

Dupont then met with Doug Campt, Director, Office of Pesticide Programs to discuss their proposal. Dupont's proposal was then presented to Linda Fisher, Assistant Administrator for Pesticides and Toxic Substances for a final decision.

Linda Fisher made the decision to accept Accent for full registration review and to expedite review of this application.

Therefore, I am requesting an expedited review of the data by February 15, 1990.

For any further information concerning this chemical please contact the Product Manager, Robert J. Taylor at 557-1800.
