OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

SUBJECT: PP#0G3892 -- SAN 582H Herbicide. Verification of
Tolerance Levels Used in Risk Assessment.

DP Barcode: D174178. CBTS No. 9303.

FROM: Michael T. Flood, Ph.D., Chemist
Tolerance Petition Section II
Chemistry Branch I -- Tolerance Support
Health Effects Division (H7509C)

Mike Flood

THROUGH: Debra F. Edwards, Acting Chief
Chemistry Branch I -- Tolerance Support
Health Effects Division (H7509C)

Debra Edwards

TO: C. Giles-Parker, PM 22
Fungicide-Herbicide Branch
Registration Division (H7505C)

CBTS has been requested by RD and SACB to confirm that the tolerances used in the DRES analysis for SAN-582H are the correct ones. The enclosed DRES analysis used tolerances of 0.01 ppm for soybeans, soybean processed products, corn and corn processed products. These are the correct temporary tolerances, as proposed in PP#0G3892 (SAN-582H in/on corn) and PP#1G3980 (SAN-582H in/on soybeans). It should be noted that processing studies were not submitted in either petition. For temporary tolerances, such studies were not necessary. Therefore the proper tolerance to be used for processed commodities is the tolerance on the rac -- 0.01 ppm for both corn grain and soybean grain.
