To: Andrea Beard, PM Team 41 (7505C)
From: G.F. Kramer, Ph.D., CBTS (7509C)

ID#: 95AL0006
DP Barcode: D217963
CBTS#: 15987
Chemical

EPA Approved Common Name: None
Chemical Name: 4-bromo-2-(chlorophenyl)-1-(ethoxymethyl)-5-
(trifluoromethyl)-1H-pyrole-3-carbonitrile

Formulation Trade Name: Pirate 3SC
Registration#: 241-GAT
Class: Insecticide-Miticide
State or Agency applying for exemption: AL
Type of exemption: Specific
Reason: To control tobacco budworm in 640,000 acres

RECOMMENDATION

Tox considerations permitting, CBTS has no objection to the issuance of
this Section 18 exemption provided that a plantback interval of at least 60
days is specified for all rotational crops. An agreement should be made with
FDA regarding the legal status of the treated cottonseed in interstate
commerce.

CONCLUSIONS

1. The metabolism of Pirate in/on cotton is adequately understood.
The residue of concern is the parent compound only.

2. The metabolism of Pirate in/on animals is adequately understood.
The residue of concern is the parent compound only.

3. Adequate methods are available for the enforcement of the current
tolerance expression (MRID# 427702-37). A satisfactory method trial of the
cottonseed method (M-2216) has been conducted by EPA's Analytical Chemistry
Laboratory and the method will be forwarded to FDA when a permanent tolerance
is established. The meat and milk method has been submitted in conjunction
with PP#F4456 (MRID# 434928-57).

4. Analytical reference standards for Pirate are available from the
EPA Repository, RTP.

5. CBTS anticipates that residues of Pirate are not likely to exceed
the following levels as a result of the proposed use:

<table>
<thead>
<tr>
<th>Material</th>
<th>ppm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cottonseed</td>
<td>0.50</td>
</tr>
<tr>
<td>Milkfat (reflecting 0.01 ppm in whole milk)</td>
<td>0.15</td>

Residue data taken from: PP#3G4224-Pirate/cotton (MRID# 427702-38)

Additional Information

1. An EUP for the use of Pirate on cotton with a temporary tolerance of 0.5 ppm on cottonseed was granted in February, 1994 and CBTS's review of PP#3G4224, dated 1/26/94.

2. In conjunction with PP#5F4456, American Cyanamid has proposed permanent tolerances for Pirate in or on cottonseed, milk, milk fat, meat and meat by-products at 0.50, 0.01, 0.15, 0.01 and 0.10 ppm, respectively.

3. The Pirate label does not specify any rotational crop restrictions. Based on a preliminary review of the confined rotational crop study (MRID# 434928-51) submitted with PP# 5F4456, a 60 day plantback restriction is required for all crops. The following statement should thus be added to the Pirate label: "Do not plant rotational crops within 60 days of final application."
