CONCLUSIONS

Toxicology Branch 1 has evaluated the revised product chemistry review of Imidacloprid dated August 25, 1994 by Bipin Gandhi and determined that there are no concerns raised by the change in impurities.

ACTION REQUESTED

The revised product chemistry data review changed the levels of impurities in the technical. TB1 has been requested to evaluate the impact of this on impending food uses.

DISCUSSION

Based on a phone conversation on 10/19/94 with Bipin Gandhi, the Product Chemistry reviewer, the percent impurities is decreased. Therefore TB1 has no concerns about this change and it should have no impact on the impending food uses.
