EPA Petition or EUP No. _____

Date Division Received 09/08/98

Type Product(s) Insecticide

Data Accession No(s) 446473-01 (98-081)

Product Mgr./Chemical Review Mgr/Contact Person PM 03 Division RD

Product Name(s) Maxforce Ant Bait F1

Company Name(s) Maxforce Insect Control Systems

Submission Purpose Examine to ascertain if packaging is CRP

Active Ingredient(s), PC code, & % Fipronil

Summary of Findings

Station tested is 2.25" x 2.25" x 0.375" with holes 0.25". The station is 25ml gray HIPS base and 30ml red K resin debossed lid index weld. The station sold is the same as the station tested. Station containing lipstick placebo mixture tested with children getting 24 single (not attached to each other) stations at the beginning of the test. Failure was defined as evidence of lipstick indicator on the child or meeting a set of criteria agreed to by EPA and the registrant. A child failure was defined as access to more than eight individual bait stations. The results indicate one child (23), a 42 month old female, gained access to one bait station. There were no child failures. The study is a pass of the child test according to the sequential test chart in 16 CFR 1700.20. The CRP certification dated 9/4/98 is acceptable.
