**MEMORANDUM**

DATE: June 19, 2007

SUBJECT: Clarification on the Revised Drinking Water Assessment in Response to Registrant Comments on Comparative Drinking Water Assessment for Proposed and Registered Fipronil Uses (PC Code 129121; DP Barcode 322415).

FROM: James Hetrick, Ph.D., Senior Physical Scientist  
Nancy Andrews, Ph.D, Branch Chief  
Environmental Risk Branch 1  
Environmental Fate and Effects Division (7507P)

*James G. Hetrick 6/19/07*  
*Nancy J. Andrews 6/19/07*

TO: Richard Gebken, RM 10  
Insecticides Branch  
Registration Division (7505C)

This memorandum provides a correction in the recommended estimated drinking water concentration (DWC) reported in the revised comparative drinking water assessment (DP 322415, 319940, 328892, June 26, 2006). The corrected DWCs for fipronil are as follows:

From the registered and proposed uses for fipronil, the highest concentrations of fipronil and its degradation products in surface source drinking water are expected to be from the proposed use on onion seeds. Fipronil concentrations in surface source water are not expected to exceed 2,654.1 ng/L for the 1 in 10 year peak concentration, 317.9 ng/L for 1 in 10 year annual average concentration, and 161.2 ng/L for the 30 year annual average concentration.
