Antimicrobial Testing Program

Tracy Lantz
Antimicrobials Division
February 19, 2014

Recent Updates to Web

- ⦿ ATP Testing Status
- ⦿ List A: Sterilants
- ⦿ List B: Tuberculocides
- ⦿ List C: Products effective against HIV-1
- ⦿ List K: Products effective against *Clostridium difficile* spores

Next Steps: Correcting Errors

- ◉ Tracy Lantz is the initial point of contact
 - Lantz.tracy@epa.gov
 - (703) 308-6415
- ◉ PMs investigate concerns
- ◉ PMs will correspond with registrants
- ◉ Goal: Update the list w/in 4 to 6 weeks

Next Steps: Additional Testing

- ◉ Address products held in abeyance
 - New performance standard: UDM
 - Registrant must test according to new UDM protocol or the Agency will consider the product as a failure
 - Letter to registrants will be issued in March

- ◉ 2014 Agency ATP testing priorities:
 - Old ATP product failures that have not been addressed by the registrant per July 2013 letter.
 - Approx. 45 new products registered 2010-2013
