**Appendix 6-1:
North American Hazardous Materials Management Association (NAHMMA)
Storage and Disposal Questionnaire for States**

Appendix 6-1: North American Hazardous Materials Management Association (NAHMMA) Storage and Disposal Questionnaire for States

When answering the following questions please keep in mind that we are only interested in requirements/practices for *consumer* uses of pesticides and hard surface cleaner containers and unused product, not *commercial, agricultural, or industrial uses*.

- 1) Please describe your state's requirements/policies/programs for disposing pesticides and hard surface cleaner containers and unused product.

If available, could you send me a copy of these requirements/policies/programs?

Are you aware of local requirements/policies/programs that are different?

Does your state generally defer to the localities to develop these requirements/policies/programs?

How do they vary?

Do you know of someone at the local level that I might talk to (where requirements/policies/programs are very different from the state's)?

- 2) Please describe your state's requirements/policies/programs for recycling pesticide and hard surface cleaner containers.

What criteria do you use to determine what can be recycled?

If available, could you send me a copy (requirements/policies/programs and criteria)?

Are you aware of local requirements/policies/programs that are different?

Does your state generally defer to the localities to develop these requirements/policies/programs?

How do they vary?

Do you know of someone at the local level that I might talk to (where requirements/policies/programs are very different from the state's)?

- 3) Does your state, or localities within your state, have a program for recycling aerosol containers?

If yes, can you describe it?

- 4) To what extent do consumers participate in, or react to, local hazardous waste pick up days/amnesty programs, etc. for containers and unused product in your state (particularly pesticides and cleaners if you know)?

- 5) To what extent do consumers participate in, or react to, recycling programs for aerosol containers and plastic containers in your state?

- 6) Can you describe any requirements or common practices related to storage of pesticides and hard surface cleaners in your state?

If available, could you send me a copy of the requirements or common practices?
