Ogden, UT 84405

To Whom It May Concern,

The Health Department has reviewed the XL proposal and feel that the method of disposal of this particular waste will be appropriate and should reduce emissions in the environment.

The benefits we see that this will offer is:

1. It will eliminate the transportation of explosive hazardous waste over the County and State road.
2. The produce package will be smaller, which should mean that they can be handled in a safer method.
3. It appears that this would reduce open burning emissions from Thiokol.

Thank you for allowing us to review this new method.

Sincerely,

Joel B. Hoyt
Environmental Health Director
