*Project XL 2000 Comprehensive Report* compiles available information on Project XL. It follows up the work started in the *Project XL 1999 Comprehensive Report* (October 1999).

This report has two volumes. *Volume 1: Directory of Regulatory, Policy, and Technology Innovations* describes more than 70 innovations being explored by Project XL. These innovations are catalogued by the core functions that are the fundamental processes and operations the U.S. Environmental Protection Agency must use in order to perform its mission to protect human health and the environment. Volume 1 presents technical and policy information relevant to each innovation.

*Volume 2: Directory of Project Experiments and Results* summarizes the more than 50 projects and project proposals Project XL has produced to date. The 16 projects that have been underway for a year or more are described in some detail, including, background, progress in meeting commitments, benefits for the environment, benefits for stakeholders, benefits for the project sponsor, spin-off benefits (where applicable), key issues needing resolution, lessons learned, and information resources. For the 37 projects in implementation for less than one year or still under development, only background information is given.

For a short overview of program accomplishments please see *Encouraging Innovation, Delivering Results* (September 2000) @ <http://www.epa.gov/projectxl/>.
