Autoliv XL Project

Mr. Downs,

This letter is to inform the State of Utah, Division Of Solid and Hazardous Waste, that the Promontory Facility is withdrawing from Project XL in accordance with the Final Project Agreement Section VII (A)(4). It has been determined that the operation will not meet the new criteria set forth by the Utah division of Air Quality in the MACT standard for dioxins. Section VII (A)(4) states that Autoliv may withdraw if a new regulation is promulgated after execution of the agreement, which renders the project economically impracticable. Autoliv has determined that the cost to upgrade the system to meet the new requirements would be economically impracticable.

Autoliv regrets that Project XL will be discontinued, however we appreciate the cooperation and assistance received from those agencies and individuals involved.

Sincerely,

Rodney K. Wright
